

DOUBLE-SIDE STRUT CHANNEL-K04

Molding: Channel steel is manufactured by a series of molding dies or rolls that gradually cold work the strip into the desired channel shape. This method produces a uniform size cross section on the external dimensions

Welding: Use DC resistance welding to ensure the consistency of welding. Combine destructive test to ensure welding quality.

Function: Quickly with steel structure, concrete structure or other structure composition of various forms of support hanger system.

Material: Carbon steel

Finish: Hot-Dip Galvanized

Ordering: Specify Item, Size, length
